P R O C E E D I N G S

EXAMINATION

BY MR. MCGUIRE:

Q. Good morning, Mr. Olomo. Hi. I'm Robert McGuire. I represent the Coalition plaintiffs in this lawsuit. I am going to be asking you some questions today.

And I guess let's begin just with your name and -- your full name, and if you could spell your last name, please.

A. My name is Dominic Olomo. Last name O-L-O-M-O.

Q. Have you ever been deposed before, Mr. Olomo?

A. No.

Q. Have you ever been -- given testimony in any kind of legal proceeding at all?

A. No.

Q. So the way this works is I will ask you questions, and you answer them to the extent that you can. If anything I ask is unclear, you're certainly welcome to ask me to clarify my question.

So if I ask you something you don't understand, just tell me. I will try to rephrase it so that you do understand what I'm asking.

Curling v.

Deposition of  
DOMINIC OLOMO

1           If I ask you something -- it happens a  
2 lot -- that isn't really -- it's not completely  
3 obvious what I'm asking, you know, just tell me that  
4 you don't understand, and I will rephrase it because  
5 we want to make sure that your testimony is clear and  
6 that our questions get answered.

7           Second, you may hear some objections when I  
8 ask a question. The way this works, it's a little  
9 different than it's usually portrayed on TV. If you  
10 hear an objection, you still have to answer a  
11 question, unless you are instructed not to answer by  
12 your counsel or another lawyer. So I might ask a  
13 question, people don't like the wording I used, so  
14 they'll object.

15           If you understand the question, I'm going to  
16 let you go ahead and answer. And I may re-ask it, if  
17 they make an objection I agree with.

18           Does that make sense?

19           A. Yes.

20           Q. I understand you're represented by a lawyer  
21 here today. Is that true?

22           A. True.

23           Q. And that is Mr. Crawford?

24           A. Correct.

25           Q. Now, is Mr. Crawford representing you

1 personally or is he counsel for your employer?

2 A. Representing me personally.

3 Q. Okay. Great.

4 So, Mr. Olomo, you understand that you're  
5 under oath the same -- you understand that; correct?

6 A. Yes, I do.

7 Q. And do you understand the oath you took  
8 today is the same oath you would take if you were in  
9 a courtroom?

10 A. Yes, I do.

11 Q. Is there any reason why you cannot testify  
12 truthfully at your deposition here today?

13 A. No.

14 Q. Where are you testifying from, Mr. Olomo?

15 A. My house.

16 Q. And where is that? Just generally, what  
17 city? Where are you located?

18 A. [REDACTED].

19 Q. And what time is it there approximately now  
20 that we're starting?

21 A. It's 10:08 a.m.

22 Q. And is anyone present in the room with you  
23 as you're testifying?

24 A. No.

25 Q. What did you do to prepare for your

1 testimony today?

2 A. I just went through the subpoena that was  
3 given to me.

4 Q. And I'm going to show you a document, if I  
5 can share my screen. Bear with me here. I'm going  
6 to show you what I am going to represent to you is  
7 the subpoena. I want you just to look at it and tell  
8 me -- I'll scroll through it slowly, and you can tell  
9 me if that is, in fact, the document that you  
10 referred to just now.

11 Do you -- it should be loading right now.

12 Do you see a document that says, Coalition  
13 Plaintiffs' Notice of Intent to Serve Subpoena on  
14 Dominic Olomo?

15 A. Yes, I can see the screen, yeah.

16 Q. And this one has four pages. I'm just going  
17 to scroll through it here. So there's page 1.  
18 There's page 2. There's page 3. And there's page 4.

19 Is that the subpoena -- and I think there  
20 was actually also an attachment, but let me just pull  
21 that up.

22 Is that the subpoena that you saw?

23 A. No.

24 Q. Let me pull up a different document.

25 What did the document that you saw look

2 A. I can't -- it's just -- can I read what I  
3 have? Can I read it all the way through?

4 Q. Yes. Well, how many pages does the  
5 document you have --

6 A. Oh, I have five pages.

7 Q. Five pages? Okay. Hmm. All right. Well,  
8 let me -- let's see here. And is it -- does it begin  
9 with Exhibit 1? Is that what it says on the first  
10 page?

11 A. No. The first -- it's not -- it's not --  
12 the first -- the pages are not numbered, so yeah.

13 Q. Okay. Well, let me show you a different  
14 document.

15 A. Okay.

16 Q. All right. I'm putting up something that it  
17 should say at the top, Attachment A.

18 Do you see that?

19 A. Yeah. I have that on one page. I have that  
20 on this page.

21 Q. So that is one of the pages that you have?

22 A. Yes.

23 MR. MCGUIRE: Okay. And let's see. All  
24 right.

25 Okay. So the court reporter -- what I

Curling v.

1 would like to do is I would like to mark as  
2 Exhibit 1 for the deposition the document  
3 that I'm showing on my screen which says,  
4 Attachment A.

5 And I will E-mail that to you, and  
6 everybody -- can be circulated -- it can be  
7 circulated to everybody after the  
8 deposition, if that's okay, or I can E-mail  
9 it now, if anybody wants to see it right  
10 now.

11 Hearing no -- hearing no takers --

12 THE REPORTER: It's good. You can  
13 E-mail it to me afterwards...

14 (Discussion ensued off the record.)

15 (Plaintiffs' Exhibit No. 1 was marked  
16 for identification.)

17 BY MR. MCGUIRE:

18 Q. Okay. Great. All right. Great.

19 So, Mr. Olomo, Attachment A lists some  
20 documents to be produced.

21 Do you see that?

22 A. Yes, I can see it.

23 Q. To your knowledge, have these documents been  
24 produced as of now?

25 A. Yes.

1 Q. Were you involved in the gathering of the  
2 documents for production?

3 A. Yes.

4 Q. Who did you work with in the course of doing  
5 that?

6 A. I worked with -- I had -- I consulted my  
7 lawyer, and I did ask Dominion -- Dominion Voting for  
8 permission, too.

9 Q. Did you -- and those documents, did you  
10 produce them or did Dominion produce them? Do you  
11 know?

12 A. Can you -- the first -- yeah, I saw -- can  
13 you rephrase that question? Do you mean like -- I  
14 was the one that gave the documents out, yes.

15 Q. So let me clarify.

16 So I understand you helped gather -- you  
17 helped assemble the documents to be produced; is that  
18 right?

19 A. Correct.

20 Q. And did anyone else assist you in doing that  
21 or was it just you?

22 A. Just me.

23 Q. Okay. So when you had assembled the  
24 documents, who did you transmit them to to be

3 A. Yes.

4 Q. And then did you have any role in the  
5 production of documents after you transmitted them to  
6 Mr. Crawford?

7 A. I don't understand that.

8 Q. Did you do anything else for purposes of  
9 getting us those documents after you gave them to  
10 Mr. Crawford?

11 A. No.

12 Q. Okay. Great. Thank you. So next I just  
13 have another question.

14 Mr. Olomo, we under -- we understand that  
15 there's some equipment being produced today by Fulton  
16 County.

17 Are you aware of that?

18 A. Yes.

19 Q. What is your understanding of what's  
20 happening with that?

21 A. I wasn't involved in that, so I didn't -- I  
22 just know like I -- I heard about it, like that it  
23 was gonna all happen, but I didn't know why or...

24 Q. And what did you hear was going to be

2 nothing, but I was in the room when they were  
3 gathering the equipment, but I didn't -- no one told  
4 me anything. Yeah.

5           Q. So you just witnessed it happening?

6           A. Yes.

7           Q. Who did you witness involved in that  
8 process?

9           A. My foreman from Dominion came to gather this  
10 equipment.

11           THE REPORTER: I'm sorry. I didn't  
12 hear.

13 BY MR. MCGUIRE:

14           Q. Your boss from Dominion. Who -- and who is  
15 that?

16           A. Mitch.

17           Q. Mitch? Okay.

18           Does Mitch have a last name?

19           A. I'm -- I don't recall his last name.

20           Q. You don't know your boss' last name?

21           A. I know his last name, but it's not just  
22 coming to me. I don't want to say the wrong thing.

23           Q. Was anyone else there besides your boss,  
24 Mitch?

6 Q. Okay. All right. So you're under oath.  
7 You're aware you're under oath; right?

8 A. Yes.

9 Q. You have to tell the truth.

10 A. Yes.

11 Q. And your testimony is that you don't know

13 A. Like I said, I know I -- I can go to my

16 you know, so that's...

4 Q. So he works at the warehouse and you work at  
5 a different location?

6 A. Yes. And for the record, like, I'm just a  
7 contractor with Dominion, so yeah.

8 Q. Okay. Okay. All right. I'm going to get  
9 into all this stuff, so let's just -- I'll move on,  
10 but let -- I'm going to circle back to that.

11 I want to ask you some basic stuff just sort  
12 of about your background just so we have an  
13 understanding of your history.

14 So what's your citizenship?

15 A. My what?

16 Q. What is your current citizenship?

17 A. Nigeria.

18 Q. And have you applied to become an American  
19 citizen?

20 A. Yeah. In the process of it, yeah.

21 Q. Okay. You're in the process, okay.

22 Have you held any other citizenships besides

6 A. No.

7 Q. Did you complete high school or the  
8 equivalent?

9 A. Yes.

10 Q. And did you do that in the United States or  
11 in Nigeria?

12 A. Yeah. I did that in Nigeria and in London.

13 Q. And in London? Okay.

14 A. Yes.

15 Q. For high school?

16 A. Yes.

17 Q. And where are you from in Nigeria?

18 A. Lagos.

19 Q. Lagos? Okay. Great.

20 So you -- your high school degree is from a  
21 school in the United Kingdom?

22 A. No. I did -- you know, we have something

7 And do you have an education beyond that  
8 high school degree?

9 A. Yes. I have a --

10 Q. Tell me -- excuse me?

11 A. I have a bachelor's degree.

12 Q. Okay. Great.

13 And where did you get your bachelor's degree

8 Wait. Hold on, Mr. McGuire.

9 Dominic, do you mind speaking up? Your

14 THE REPORTER: Can you repeat your last

21 I'm just trying to get a feel for, you know, your

1 And then when did you come to the United  
2 States after that?

3 A. 2014, yeah.

4 Q. 2014, okay.

5 So when you came to the United States in  
6 2014, did you come for a job?

7 A. A job? No.

8 Q. So you came to the United States and then  
9 you found employment after you arrived?

10 A. Yes.

11 Q. And that was in 2014?

12 A. Early 2015, yeah.

13 Q. So early 2015 was when you arrived or when  
14 you found employment?

15 A. That was when I found employment, yeah.

16 Q. Okay. Great.

17 So let's start from there, from your early  
18 2015 first employment in the United States. Just  
19 tell me who you've worked for since early 2015.

20 A. So I worked with this company called Abidek  
21 International. They are a shipping company. So --

22 Q. Can you -- let me stop you. Can you spell  
23 that, Abidek?

2 Q. And what kind of company is that?

3 A. It's a shipping company, shipping -- export  
4 company.

5 Q. And where did you -- where were you when you  
6 worked for Abidek International?

7 A. Georgia.

8 Q. In Atlanta or -- Atlanta area?

9 A. Yeah, yeah. Atlanta area, yeah.

10 Q. Have you been in the Atlanta area since you  
11 arrived in the United States in 2014?

12 A. No. I was in Florida for a few months.

13 Q. For a few months?

14 A. Yes.

15 Q. And then you moved to Georgia?

16 A. Yes.

17 Q. And then you were hired by Abidek  
18 International after you moved to Georgia?

19 I'm sorry. Were you hired by Abidek --

20 A. Yes.

21 Q. Okay. And how long did you work for Abidek  
22 International?

23 A. About six months.

24 Q. And what did you do for them?

25 A. I just -- I set up their server and -- yeah.

7 A. I worked with this company called HCI.

8 Q. HCI?

9 A. Yeah.

10 Q. Were they also in Atlanta?

11 A. Based in Florida.

12 Q. And -- but were you in Atlanta?

13 A. Yeah, I was in Atlanta, but I -- what we do,  
14 I -- what I did for HCI, I traveled around hospitals

16 Q. And when you say, "to manage the application

21 A. Yeah.

18 Q. And you mentioned that you were -- you were

20 that right?

21 A. Yes. Correct.

22 Q. Okay. So when you were hired by Dominion in

4 A. Yes.

5 Q. So tell me -- tell me about your job for  
6 Dominion as a county technician. What do you do in

8 A. Basically, it's simple. Just to manage the

10 Q. To mind the EMS software?

11 A. Manage. Manage the EMS --

12 Q. I apologize.

13 To manage the EMS software, okay.

14 And what does that -- so first off, what --  
15 when you say "to manage the EMS software," what do

20 Q. Can you spell -- oh, server. I'm sorry.  
21 I'm very sorry.

22 Okay. Manage the EMS server. Okay.

23 All right. So when you say the EMS server,  
24 what does that mean?

25 A. It's -- the EMS server means we have

1 different -- they have literally like two  
2 applications on that. And that's the EED and the  
3 RTR. So I was trained by Dominion in December 2019  
4 how to use these two applications.

5 Q. And the first one you said was the what?

6 A. The EED.

7 Q. EED. And what does that stand for?

8 A. It's not coming to me right now.

9 Q. What does that -- is that a module? That's  
10 a separate program from the RTR?

11 A. Yeah.

12 Q. Okay. So sometimes my understanding is that  
13 a server can either be a piece of hardware or it can  
14 be a software application.

15 When you say the EMS server, do you mean the  
16 piece of hardware runs these two applications?

17 A. Yes. Correct.

18 Q. Okay. So when you say "server," you're not  
19 talking about a piece of software that's a server;  
20 you're talking about a piece of software that has  
21 these two programs running on it?

22 A. Correct.

23 Q. And the first program is the EED; right?

24 A. Yes.

25 Q. The second program is the RTR?

1 A. Correct.

2 Q. Okay. So what does the EED program do?

3 A. Basically, it's used to program the machines  
4 that were used during the election, which is like the  
5 BMD. And the BMD is the ballot marking device. And  
6 the ICP. The ICP, that's the ImageCast® Precinct.

16 ImageCast® printers -- the ImageCast® Precinct  
17 printers or scanners; is that right?

18 A. Yeah. Correct.

19 Q. Okay. And then do you know what RTR stands  
20 for?

21 A. Results tally -- yeah. Result tally, I  
22 think, record. I'm not sure. I don't -- yeah.

23 Q. Okay. What does the RTR program do?

24 A. That's used for -- to collect the results

3 A. Yes. Correct.

4 Q. And so when you say that you managed the  
5 server and we've -- we've resolved that the server is  
6 the piece of hardware that runs these two programs,  
7 do you do anything else in Fulton County apart from  
8 managing those two programs on that piece of  
9 hardware?

10 A. Yeah. Correct. So I also, like,  
11 troubleshoot those equipment.

12 Q. So you troubleshoot all the election  
13 equipment or just that piece of equipment?

14 A. All election equipment -- most of the  
15 election equipment going from the BMD and the ICP --  
16 which is basically what Dominion Voting provided.

17 Q. So all the equipment in Fulton County, if  
18 there's a problem with any of it, you are the person  
19 that helps troubleshoot it?

20 A. Correct. If it's a Dominion Voting machine,  
21 yes.

22 Q. So if it's a Dominion scanner or a Dominion

8 Q. Poll managers, okay.

9 Have you been given any training in

6 A. I'll say most of the time, yeah. Ninety  
7 percent of the time.

8 Q. Because there's always an election getting

10 A. Correct.

11 Q. Do you ever work at polling places?

12 A. No -- yeah, I do -- I do go to polling

14 Q. If there's a need?

15 A. Yeah.

16 Q. And what about -- the Fulton County

19 A. No.

20 Q. So do you have a workstation there?

21 A. Yes. You can say that, yeah.

7 And is that -- when you say "personal," do

10 A. My personal laptop.

11 Q. Okay.

12 A. Not that Dominion gave me.

13 Q. And is that the laptop that you use in your

15 A. I don't use it for Fulton County. I use it  
16 for my personal use.

17 Q. So when you don't have work to do for

19 A. Well, I don't use it for work. It's just to

21 Q. Okay.

22 A. Yeah.

23 Q. If you're not doing work stuff, you have

6 Q. So if someone from Fulton County wants to

8 A. On the phone. They call me.

9 Q. Do they E-mail you ever?

10 A. Ever? No. No, they don't E-mail me. They

5 A. Only if they need for me to go to the

7 Q. And you would know if you're needed because  
8 someone would call you and say we need something done  
9 or you would have something to do to prepare; is that

11 A. Actually, it's the other way around. If

6 Q. So voting happens in polling places; right?

7 A. Correct.

8 Q. In-person voting happens in polling places?

9 A. Yeah. Correct.

4 yeah. The last one, too, was State Farm.

5 Q. And then -- so voters vote in polling

8 A. Correct.

9 Q. What happens at the Fulton County warehouse

11 A. Okay. So the question -- I don't understand

13 Do you mean election generally or -- because

15 Q. Yeah. You know what? I'm going to circle

20 So when you are working for Fulton County

6 Q. Well --

7 A. Yeah.

8 Q. -- who do you report to?

9 A. I report to Fulton County warehouse manager.

10 Q. And who's that?

11 A. Derrick Gilstrap.

12 Q. Do you report to anyone else?

13 A. Yes. I report to Dominion project manager  
14 Scott Tucker.

15 Q. Scott Tucker is the Dominion project

17 A. Correct.

18 Q. And do you report to anyone else besides  
19 Derrick Gilstrap and Scott Tucker?

20 A. Yeah. I have my regional -- regional

7 Q. That was in December of 2019 when you were  
8 first hired?

9 A. Correct.

10 Q. So you -- so is he a boss or is he a trainer

12 A. I'll say a trainer, yeah.

13 Q. Does he have a title, a job title?

14 A. I don't know.

5 A. Yeah. Just to get ready -- like, you know,  
6 just log into the server, so he can get some  
7 equipment ready.

8 Q. And so he asked you to log in, so he could  
9 get some equipment ready.

10 And then did he do anything else with you?

11 A. No.

12 Q. So you logged him in.

13 And then did you observe what he did?

14 A. Yeah. I was standing right by him, yeah.

15 Q. So what did he do while he was logged in?

16 A. All he did was just normal programming, poll  
17 worker card, the tech card and the USB.

18 Q. So he programmed a US -- I'm sorry. I'm  
19 going to ask you to go through those.

20 So he programmed what now?

21 A. Basically, what he did was just program the  
22 poll worker card, the tech card, the USB. We did  
23 everything we use during -- you know, to program the  
24 voting equipment.

5 A. Poll worker card.

6 Q. The poll worker card. So he programmed the  
7 poll worker card.

8 And then what was the second thing he  
9 programmed?

10 A. The tech card.

11 Q. A tech card.

12 What is a tech card?

13 A. A tech card is the card -- that's like the  
14 administrator card.

15 Q. Is that used by voting workers or is it used  
16 by Dominion people?

17 A. Not Dominion people. It's used by anyone  
18 that's going to work on the voting machine.

19 Q. So what would you use a tech card to do, for  
20 example?

21 A. To program the ICX machine.

22 Q. And what's the ICX machine?

23 A. That's the ImageCast® X. ImageCast® X. So

4 Q. Is it a BMD screen?

5 A. Yeah. You call it -- yeah, BMD screen you  
6 can call it.

7 Q. So it's the touch screen that voters touch?

8 A. Correct.

9 Q. So a tech card allows you to program a touch  
10 screen?

11 A. Correct.

12 Q. And then so he did a poll worker card, a  
13 tech card, and then you said a USB stick?

14 A. Yeah. Correct.

15 Q. What is that -- what was -- what programming  
16 goes on that?

17 A. It's the same thing just it goes with the  
18 tech card. So it's basically the same thing. Does  
19 the same work as a tech card.

20 Q. Okay.

21 A. They go hand-in-hand.

22 Q. So why do you need both of those?

23 A. Because the USB has database on it, and the  
24 tech card is used to program it.

5 BY MR. MCGUIRE:

6 Q. Okay. So he programmed a USB with the  
7 database.

8 By program -- I mean, a USB is a storage  
9 device; right?

10 A. Correct.

11 Q. So when you said he programmed the USB, what  
12 do you mean exactly?

13 A. Come again, please? You said program the  
14 USB?

15 All he did was just -- okay. So when you're  
16 programming -- when you -- you put -- not the old  
17 database -- when you say database -- the database --  
18 what we understand is database is like the whole  
19 election -- election project. But no.

20 So what he did was just program -- put a  
21 program on it so that the ICX machine -- we  
22 understand what precinct that ICX machine is being  
23 allocated to.

24 Q. So you saw him program the poll worker card,

6 program on the USB is just the precinct. Like, it's

9 has been allocated to.

10 Q. Okay.

11 A. Yeah.

16 it's more like a rack, but like I said, like it's a  
17 cage. So it has a door. You need to open the door  
18 for you to access the server.

19 Q. Can you access any part of it from the  
20 outside or do you have to open the cage to access it?

21 A. You have to open the cage to access it,  
22 yeah.

23 Q. And is the cage -- is there a lock on it?

24 A. Yeah. There's a latch on it.

25 Q. A latch.

1 Does the latch have like a padlock or is  
2 there any way it's locked?

3 A. Yeah. It has a key lock.

4 Q. Is the key a padlock or is it built in?

5 A. It's built in.

6 Q. And who has the key?

7 A. The Fulton County warehouse manager.

8 Q. What about you? Do you have a key?

9 A. I do not have a key.

10 Q. So if you need to get into the rack to  
11 access the server hardware, you have to get the key  
12 from Derrick Gilstrap?

13 A. Yes. No. Okay. So how it works,  
14 there's -- the rack is in the warehouse. The  
15 warehouse door is always locked.

16 Q. Okay.

17 A. Yeah.

18 Q. Well, do you have access to the warehouse  
19 yourself?

20 A. No, I do not.

21 Q. So it has to be opened by somebody before  
22 you can go there?

23 A. Correct.

24 Q. And then I think once you're inside the

3 Is it locked?

4 A. Locked -- what do you mean "locked"? What  
5 do you mean by "locked"? Yes. It is locked, yeah.

6 Q. So can you open it without the key?

7 A. Yes, you can open it without the key.

8 Q. So it's -- is it inside any kind of locked  
9 room inside the warehouse?

10 A. Yes.

11 Q. And that's where it stays?

12 A. Correct.

13 Q. Who has access to that room?

14 A. The Fulton County warehouse manager.

15 Q. And anybody else?

16 A. Not to my knowledge.

17 Q. So if you need to access the rack, you --  
18 what do you do?

19 A. When I come in in the morning, the Fulton  
20 County warehouse manager is always there, so...

21 Q. So how would you access the rack if you come  
22 in and he's there?

23 A. I always walk by his office. So like first

6 Q. I'm sorry?

7 A. He walks me to the server every day.

8 Q. He walks you to the server every day?

9 A. Yeah.

11 A. Not every day, not if I don't need to, no.

13 Q. Have you ever seen anyone else besides you

15 A. Yeah. Fulton County employees, yeah.

18 A. Correct.

19 Q. They are people you recognize?

20 A. Correct.

7 A. No one.

8 Q. How many -- I mean, the room where it's

10 in that room?

11 A. Yes. We have the voting machines, the BMDs  
12 and the ICPs, and we have an ICC scanner right by the  
13 server.

14 Q. That sounds big. How big is the room?

15 A. It's big. It's a warehouse.

16 Q. Oh, so the warehouse is the room?

17 A. The warehouse has offices attached to it, so  
18 when I say "the warehouse," the warehouse offices,

10 question.

11 Q. Based on what you've seen, have you seen  
12 people go in and out of that room without unlocking  
13 and locking it?

16 I don't think they have access to it.

17 Q. So the people who go in and out, are you

6 A. Not always locked. It's always locked.  
7 It's closed. It's a rack. It's a cage.

8 Q. It's always closed, but you could open it by  
9 pulling on the door to open it?

10 A. Correct.

11 Q. And that rack is stored inside a room that  
12 10 to 15 people work in, and it is not always locked  
13 during business hours; correct?

14 A. The door itself, yeah. If you need to go  
15 out, you can go out and come, yeah, correct.

16 Q. And is there also a loading dock door that  
17 goes into that room?

18 A. No, not inside that room.

19 Q. That's a different room?

20 A. Yeah.

21 Q. Is there any kind of sign-in sheet for

1           Okay. I want to ask you about how elections  
2 are conducted in Fulton County. I want to ask you  
3 about the workflow of actually conducting an  
4 election. And I want to break it into pieces.

5           So the areas I want to cover are logic and  
6 accuracy testing and then how votes are cast and  
7 recorded and then how the results are tabulated, just  
8 so you know where I'm going. Okay?

9           So I want to start with logic and accuracy  
10 testing. Do you know what that is?

11          A. I do.

12          Q. What is logic and accuracy testing in your  
13 mind?

14          A. It's not just in my mind. It's what it  
15 stands for.

16          Q. What does it stand for?

17          A. It stands for -- logic and accuracy is to  
18 make sure that the machines going out for election or  
19 advance voting, they are certified and...

20          Q. So how do you -- have you been trained on  
21 how to conduct logic and accuracy testing?

22          A. Correct.

23          Q. Who trained you for that?

24          A. Dominion.

25          Q. Has Fulton County separately trained you?

1 A. I work with Fulton County, yes.

2 Q. When logic and accuracy testing is  
3 conducted, who conducts it, you or Fulton County  
4 people?

5 A. Fulton County people, and I do, too.

6 Q. You do it as well?

7 A. Yes.

8 Q. How do you decide who's going to do it?

9 A. I don't decide. Fulton County decides.

10 Q. So they'll ask you to do it sometimes?

11 A. Correct.

12 Q. Does somebody watch you while you do it?

13 A. Yes. Like I said, we work in groups, so  
14 it's a group. It's a group of four techs. And I  
15 could be in any group.

16 Q. Did you ever train anyone at Fulton County  
17 on logic and accuracy?

18 A. Yes.

19 Q. Who, for example, have you trained?

20 A. I would say no -- yeah. No, no. They told  
21 me -- they asked me how -- basically, I train them  
22 how to use Dominion machines, not, you know, how  
23 to -- because it's different to train them how to use  
24 the machines and how they go about doing the L&A. So  
25 the process is different. So how to use the

1 machines, yes, I train them on how to use the  
2 machines.

3 Q. So using the machines for the logic and  
4 accuracy testing is different than using the machines  
5 for conducting an election?

6 A. No. That's not what I said.

7 Q. Okay.

8 A. I said during L&A I train them how to use  
9 the machines.

10 Q. Okay.

11 A. And then during L&A, during voting, the same  
12 thing. But the process of L&A has to do with Fulton  
13 County, how they want to conduct an L&A, you know.

14 Q. Okay.

15 A. How many precincts they have. That process  
16 is different.

17 Q. And are you aware of what the -- what the  
18 state requirements are for conducting logic and  
19 accuracy testing?

20 A. Yeah. I believe that was how Dominion  
21 trained me.

22 Q. So did Dominion train you to do a test of  
23 every contest on every machine?

24 A. What do you mean, "contest"? You mean every  
25 candidate of every ballot style? Is that what you

2 Q. Yes.

3 A. Yes.

4 Q. So that is how Dominion trained you to  
5 conduct a logic and accuracy test?

6 A. Correct.

7 Q. And then is that what you have observed is  
8 what Fulton County does when it conducts logic and  
9 accuracy tests?

10 A. Correct.

11 Q. So you -- in your experience, you're saying  
12 Fulton County tests every contest and every ballot  
13 style on every machine?

14 A. Correct.

15 Q. So logic and accuracy testing happens when?

16 A. I don't decide when.

17 You mean dates?

18 Q. Well, just in the context of an election,  
19 when does it happen?

20 A. Before the equipment are shipped out to the  
21 voting locations.

8 Q. And when you say shipped out, you mean --  
9 where is the equipment shipped out from?

10 A. From the Fulton County warehouse.

11 Q. And where is it shipped out to?

12 A. Different voting locations. Depends on the  
13 precinct.

14 Q. So does that mean that between elections all  
15 of the equipment is stored at the warehouse?

16 A. Correct.

17 Q. And then it's all tested through logic and  
18 accuracy testing. And then it's shipped out to the  
19 polling places?

20 A. Correct.

21 Q. And when you say equipment, what equipment  
22 gets tested in logic and accuracy testing? What

14 ballots or does it process them in some way?

15 A. It doesn't. It just collects.

16 Q. Just collects.

17 So then when you get your scanner back up,  
18 you then can scan those ballots?

19 A. Yes. Correct.

20 Q. So that's in-person voting.

21 And then for people who vote by mail, how do  
22 their ballots get processed?

23 A. I haven't had a firsthand experience in  
24 that, so I wouldn't know how to answer that.

25 Q. Do you have an understanding of what

1 happens?

2 A. From what I've read, yes.

3 Q. What is your understanding of what happens  
4 with mailed ballots?

5 A. It gets processed in a different department.

6 Q. And is that department -- is that what  
7 happens when the ballots get scanned by the high  
8 capacity scanners?

9 A. No. When I say in -- not that department,  
10 it's processed in a different department. But I am  
11 involved when the -- when they want to scan those  
12 ballots. I go in to program the ICC, but that's the  
13 Central scanner.

14 Q. And the Central scanner is what they use to  
15 scan all the mail ballots?

16 A. Correct.

17 Q. So then after the scanning, the ICP scanner  
18 at the polling places has a record of the votes;  
19 correct?

20 A. Correct.

21 Q. And where are those -- what records of the  
22 votes does the ICP scanner keep?

23 A. What do you mean "records of the votes"?

24 Q. So does it take a scan, like a picture of  
25 each ballot that it scans? Does it have that saved?

1 A. I wouldn't -- I can't answer that.  
2 That's -- I wasn't trained like that. I wasn't --  
3 yeah.

4 Q. Well, okay. So -- all right. Let me back  
5 up.

6 So if the ICP scanner is -- you scan  
7 in-person votes through the ICP scanner. It reads  
8 the ballot; correct?

9 A. Correct.

10 Q. And it interprets what the votes are; right?

11 A. Correct.

12 Q. How does it store that information?

13 A. It stores it on the CompactFlash card.

14 Q. On a CompactFlash card, okay.

15 Now, we've seen ballot images which look  
16 like they're scanned images of the ballots.

17 Is that done on the ICP?

18 A. I can't answer that. That would be a  
19 Dominion thing to answer.

20 Q. So you've never been trained on ballot  
21 images at all?

22 A. No.

23 Q. And I don't want to jump ahead of myself,  
24 but I have in mind the pictures of the ballot that  
25 the adjudication people look at.

1 A. Correct.

2 Q. I want to understand if you know where that  
3 picture comes from that the adjudication people look  
4 at.

5 A. Yeah. So that's for -- that's coming from  
6 the ICC, the Central scanner. And, yeah, I was  
7 trained on how to get those images in the Central  
8 scanner.

9 Q. So what about for the people who vote  
10 provisional or emergency ballots, do they not go  
11 through adjudication?

12 A. I don't know.

13 Q. But those scanned pictures of ballots,  
14 you're saying that doesn't happen at the precinct  
15 scanner?

16 A. Again, I can't answer that.

17 Q. You don't know?

18 A. Yeah.

19 Q. All right. So for the ICC, the Central  
20 scanner, what kind -- how does it store the pictures  
21 of the ballots that it scans?

22 Sorry. Did I cut out there?

23 A. Yeah, a bit, you did.

24 Q. Let me ask again.

25 So for the ICC scanner, the Central scanner,

\*\*\*\*\* C E R T I F I E D \*\*\*\*\*

Curling v.

1 how does it store the pictures of the ballots? Where  
2 does it store those?

3 A. In the C drive.

4 Q. Okay.

5 A. There's a folder in C drive that stores  
6 those images.

7 Q. And does it interpret the votes as it scans  
8 just like the precinct scanner does?

9 A. I wouldn't -- I wouldn't know. No. I don't  
10 know.

11 Q. So I guess I'm asking -- or I guess the  
12 question I would have then is: Each precinct  
13 scanner, after you scan the ballots in the precinct,  
14 has a total of how the votes came out; right?

15 A. Correct.

16 Q. Does the Central scanner have a total of how  
17 the votes came out?

18 A. Yes.

19 Q. So then would you agree that that means it  
20 must be interpreting the votes in counting them?

21 A. Again, you know, I just -- based on what I  
22 was trained in, I could see the numbers and that's  
23 it.

24 Q. Can you think of any way that the Central  
25 scanner would be able to come up with numbers without

1 reading the ballots that it's scanning?

2 A. I don't understand your question.

3 Q. So you -- I believe you just said the ICC  
4 has numbers of votes, correct?

5 A. Numbers of votes, yeah.

6 Q. For different candidates; right? It counts  
7 the votes --

8 A. Yes.

9 Q. -- that go through it?

10 A. Correct.

11 Q. So would you agree that that has to mean  
12 it's reading the ballots that it's scanning?

13 A. Yes. Correct.

14 Q. So it reads the ballots and comes up with a  
15 total for the different races and it saves a picture  
16 of the ballot.

17 That's the ICC; correct?

18 A. Correct.

19 Q. But the ICP at the precincts, it -- we don't  
20 know -- you don't know whether it takes a picture of  
21 the ballot?

22 A. Yeah, I don't know.

23 Q. And that is how -- I'm sorry?

24 A. I said based on my training.

25 Q. Okay.

1 A. Yeah.

2 Q. So you don't know how provisional and  
3 emergency ballots are scanned or how they are  
4 adjudicated because there's no image; right?

5 A. Come again? Again, on adjudication I don't  
6 know. I wasn't trained on adjudication.

7 Q. So how do the -- so you said that the ICP  
8 has a CompactFlash card that stores the vote totals;  
9 right?

10 A. Correct.

11 Q. Does the ICC also have a CompactFlash card?

12 A. No.

13 Q. What does it use instead?

14 A. It stores -- it stores all the images and  
15 results in the C drive.

16 Q. And then -- so then what happens with the  
17 results? How do they get -- what's the next step  
18 after the scanning?

19 A. On the ICC or the ICP?

20 Q. Let's do the ICP first, the precinct  
21 scanner. What happens to the votes on the precinct  
22 scanner after the scanning is over after an -- at the  
23 end of election day?

24 A. The CompactFlash card comes back to Fulton

2 Q. Via the RTR application?

3 A. Yeah.

4 Q. And then what happens with the -- and do you  
5 do that or does someone else do that?

6 A. I do that. Fulton County employees, too,  
7 can do that, yeah.

8 Q. So you -- so how does that actually work?  
9 You get a CompactFlash card. What do you do with it?

10 A. So I hold the CompactFlash card -- Flash  
11 card in my hand. And there's a card reader attached  
12 to the workstation that's attached -- that's  
13 connected to the server. So all I do is just load it  
14 up on there, using the card reader, onto the  
15 workstation.

16 Q. And then does it download it automatically,  
17 the votes?

18 A. Automatically, yeah, it does.

19 Q. When you do that, do you have to be logged  
20 in as a user on the workstation?

21 A. Correct.

22 Q. When Fulton County employees do it, do they  
23 log in also?

24 A. Yes. Everyone has to log in, yeah.

25 Q. Does everyone have a different login?

1 A. No.

2 Q. So everyone uses the same login?

3 A. Yeah. It's small -- it's a workstation.

4 It's one -- they administer the workstation. It's  
5 right in the same cage as the server.

6 Q. Okay.

7 A. And that's what we use on election night to  
8 load up the CF card.

9 Q. So when you load the CF cards, you or a  
10 Fulton County worker logs into the workstation and  
11 uses the card reader to upload each card one by one?

12 A. Correct.

13 Q. When you are logged in, is the account that  
14 you're logged in as, does it have limited permissions  
15 or is it an administrator account?

16 A. It's an administrator account.

17 Q. So it can do anything at all on the server  
18 that it wants to?

19 A. No. You have to log on to the server  
20 because you're logged into your workstation.

21 Q. So that's different than logging into the  
22 server?

23 A. Correct.

24 Q. So the server has clients and you're logging  
25 into the workstation client?

4 A. Correct.

5 Q. And the workstation hardware is connected to  
6 the server hardware; correct?

7 A. Correct.

8 Q. Is that an Ethernet cable?

9 A. No -- yeah. Yeah, it's an Ethernet cable,  
10 but not connected to the Ethernet, yes.

11 Q. But it's connected through an Ethernet  
12 cable, the two devices?

13 A. Correct.

14 Q. Is there some kind of Ethernet hub that  
15 allows multiple workstations to be connected to the  
16 server hardware?

17 A. Correct.

18 Q. And is any of that equipment connected to  
19 the public Internet?

20 A. No.

21 Q. Does any of that equipment have WiFi?

22 A. No.

23 Q. So when you put the CompactFlash card into

4 Q. So is it possible that there are images  
5 there that you just don't know about?

6 A. I don't -- like I said, again, I don't know.

5 So the ballot was smeared, and she was trying to scan

18 Do you -- can you tell me about that?

19 A. Yeah. So the Fulton County employee comes

21 County warehouse. And they -- we have, like, two --  
22 in the Fulton County warehouse, Fulton County has

1 for four USB drives or five, depending on how many

3 or how many tablets that was used.

4 So I give it to them, they go back to  
5 whatever scanning was taking place, and they bring  
6 back the results to the warehouse.

7 Q. So have you ever witnessed that process at  
8 the Central scanner?

9 A. Yes.

10 Q. So what do they do with the USB drive to get  
11 the data off of the scanner and onto the USB drive?

12 A. They plug in the USB drive and move the  
13 vote -- move the result from the -- one of the  
14 folders in the C drive, the DVS folder. They move  
15 the results, put it on the USB drive, and they bring  
16 the USB drive back to the warehouse.

17 Q. Now, is there a formal process for that?  
18 Like, are there steps that they're supposed to follow

20 A. You mean technically?

21 Q. Yeah. Is there like a step-by-step process?

22 A. Yes.

23 Q. Do you know what that process is?

24 A. Yes. Technically, I do.

25 Q. Can you just summarize it for me? What is

1 the process?

2 A. So the process is you go -- you plug in your  
3 USB drive. You go into your C driver. There's a  
4 folder in the C drive called the DVS folder. In the  
5 DVS folder, you have your -- the tablet -- you're  
6 trying to move the tablet or is -- where those  
7 results have been -- the result for that scanner has  
8 been saved.

9 So you go into that set folder, which is  
10 DVS, and you go under -- there's going to be like --  
11 what's it called -- it's another folder named Result,  
12 and you have to move that folder -- the Result folder  
13 onto the USB.

14 Q. And then are the images of the ballots in  
15 that same folder or is that a separate operation?

16 A. Yeah. That's -- if you want to get the  
17 images, then you don't -- you just don't move the  
18 results. You move the whole tablet or folder, like  
19 the whole thing. You move the whole thing. Like,  
20 when you go into the DVS, you move the whole folder  
21 right from the DVS.

22 Q. And that will copy everything?

23 A. Yes.

24 Q. Now, are you leaving it on the ICC C drive  
25 when you do that and just making a copy on the USB

1 stick?

2 A. Yes. Correct.

3 Q. So now it's in two places?

4 A. Correct.

5 Q. And when they do that, as part of the  
6 procedure where there are steps, are they supposed to  
7 copy the images or just the results?

8 A. Just the results.

9 Q. So -- and this is all on election night;  
10 right?

11 A. Again, that's a Fulton County thing, yeah.

12 Q. So as far as you know, when do the ballot  
13 images get brought to the warehouse?

14 A. Ballot images? Yeah. When they copy, if  
15 they need the images, then it's copied, the whole  
16 folder. That was -- because I learned that during  
17 training. And when I was asked the question by  
18 Fulton County, I gave that information.

19 Q. And don't they need the images always in  
20 order to do adjudication?

21 A. That, I don't know. Like I said, probably.  
22 I don't know about adjudication. I wasn't trained on  
23 adjudication.

24 Q. So have you ever been asked to help with  
25 adjudication problems or do they always bring in

1 people like Brad and this woman to do that?

2 A. Yes, I've been asked. And all I do is -- so  
3 I've been asked at Fulton County to help out with  
4 adjudication. And the furthest I could go with  
5 adjudication was me making sure the application  
6 was -- had the correct license pulling from the  
7 server.

8 And as soon I opened up the application, I  
9 turned it over to the chief of election and  
10 registration to take over because I don't know how  
11 to -- what to program from there.

12 Q. So you don't run -- you don't know how to --  
13 and what's the adjudication program called? Is that  
14 different from the EED and the RTR?

15 A. Yes.

16 Q. So it's a third program?

17 A. Yes. Correct.

18 Q. But that's not one that's under your  
19 responsibilities?

20 A. Yeah. But I -- it's under my  
21 responsibilities, but I don't -- I wasn't trained on  
22 it.

23 Q. So if you have to provide help on it, you  
24 have to call someone else at Dominion?

25 A. Correct.

1 Q. And is the person you call Brad?

2 A. Yes.

3 Q. So -- all right. I think you've answered  
4 this, but I just want to make sure I understand.

5 So you don't -- you don't know how the  
6 images get from the scanners to the server for  
7 purposes of adjudication; is that right?

8 A. No. Come again. I don't --

9 Q. I'm just trying to, like, make sure I  
10 understand.

11 I understand you to be saying that you do  
12 not know how the images of ballots that have been  
13 scanned get transported and loaded onto the EMS  
14 server for purposes of adjudication; is that right?

15 A. No. (Audio distortion.)

16 Q. Sorry. You're cutting out a little bit.  
17 Can you start over? You cut out a little bit.

18 A. Okay. Yes. So what I said is Fulton County  
19 asked me if there's a way they could get images from  
20 the Central scanner. And based on my training, I was  
21 taught that.

22 And I gave that information to them, if you  
23 need to get the images plus the results, you have to  
24 copy the whole folder. That way you have everything  
25 that was scanned in, both the results, the images.

1 And that was what I passed on to Fulton County.

2 So, yes, I do know how those images go from  
3 the scanner onto the USB and onto the server. But as  
4 to the adjudication, I don't know how to  
5 adjudicate -- I don't know how to -- the adjudication  
6 software.

7 Q. Okay.

8 A. Yeah.

9 Q. So I'm a little confused by that.

10 So what you're saying then is that you know  
11 that Fulton County copies -- you told them how to  
12 copy the images?

13 A. Correct.

14 Q. And so when they bring the USB drive back  
15 from the ICC, if they do what you've told them they  
16 can do, then that USB drive will have images on it,  
17 but that's up to them?

18 A. Correct.

19 Q. And you don't know how images -- if images  
20 from the ICP precinct scanners, if those images are  
21 even saved by the precinct scanner?

22 A. Yes. Correct.

23 Q. Have you ever uploaded images onto the  
24 server or the adjudication software?

25 A. Upload. Come again. Like, technically?

1 Q. Well, just I'm wondering if you've ever  
2 actually done it. Have you ever received a  
3 CompactFlash card or USB stick with images on it that  
4 you've then uploaded onto the server?

5 A. Yes.

6 Q. Did you do that in the recent election?

7 A. Yes.

8 Q. Did you do that on election night?

9 A. No.

10 Q. When did you do it?

11 A. That was -- I can't remember. It was a  
12 Friday, but I don't remember the actual date, but I  
13 remember it was a Friday. They had -- they still had  
14 some absentee ballots to be scanned, so it was  
15 scanned, and it came in by adjudication.

16 Q. And who brought you the USB stick or the  
17 CompactFlash card?

18 A. It's always a USB when you're doing  
19 adjudication.

20 Q. Okay.

21 A. And it was Mr. Ralph Jones. That is the  
22 chief of elections and registration.

23 Q. And so on election night when you are  
24 loading information in, it's always only the results?

25 A. On the CompactFlash card, yes.

1 Q. And on the USB stick as well or no?

2 A. On the USB, I didn't do -- I didn't -- the  
3 last election I didn't load any results on the USB.

4 Q. That was done by Fulton County people?

5 A. No. That was -- I don't know who did that.  
6 I wasn't -- I don't know. I can't say.

7 Q. You didn't see that happen?

8 A. I didn't see that happen, yeah.

9 Q. But if it wasn't you, it would have to be  
10 Fulton County people; right?

11 A. Like, again, I can't say for sure.

12 Q. And just to make sure I understand this as  
13 well, so the ICC scanner has a folder that saves  
14 results, and that's what the Fulton County people put  
15 onto a USB stick and bring to the warehouse on  
16 election night?

17 A. Correct.

18 Q. I would like to ask you if you could tell  
19 me -- we obviously looked at photos, those -- that  
20 photo I showed you earlier that showed the server  
21 rack. And you have described a little bit about the  
22 Fulton County warehouse at English Street. I want to  
23 make sure I understand what equipment is used there  
24 on election night.

25 So I think you've told me there is a rack

1 with a server in it?

2 A. Correct.

3 Q. There are five workstations that are  
4 connected to the server by an Ethernet cable through  
5 a hub?

6 A. Correct.

7 Q. Is there any other equipment that is used  
8 with that setup?

9 A. Just we have one IC -- they have the ICC  
10 screen. It's called all-in-one. That's used along  
11 with the high-speed scanner.

12 Q. That's a screen? Is that how you -- I mean,  
13 what does that screen show? What's on that screen?

14 A. Okay. So the screen is just like what you  
15 said, like the high-speed scanner. That's where you  
16 get -- it's the only one. It has both -- your, like,  
17 normal computer will have a screen and a CPU, so this  
18 has the CPU and everything embedded in it, so --

19 Q. Oh, I see. Okay. So, yeah, actually, let  
20 me step back then.

21 Going back to the ICC. So the scanner  
22 itself is a device, but it's also connected to an  
23 all-in-one computer called the ICC --

24 A. Yeah. It's the ICC all-in-one. We call it  
25 all-in-one, yeah.

1 Q. So -- but there are two devices. There is a  
2 scanner and there is a computer, which is a screen?

3 A. Correct.

4 Q. And that's -- and so when they go in and  
5 they put the USB stick in, they are actually using  
6 just the Windows file system to cut and paste and  
7 copy --

8 A. Correct.

9 Q. -- to the USB?

10 A. Correct.

11 Q. And so you have an identical -- or another  
12 one of those at the warehouse.

13 Is it attached to the server or connected to  
14 the server?

15 A. Yes, it is connected to the server.

16 Q. And what is the purpose of having that  
17 separate computer be connected to the server?

18 A. Yeah. It's just we use that mostly during  
19 L&A, if we're doing L&A.

20 Q. Oh, you mean you use it -- so you test the  
21 scanner?

22 A. Yes.

23 Q. What -- is that the same kind of computer  
24 that's used with the precinct scanners?

25 A. What do you mean "precincts scanners"?

4 precincts?

5 Q. Yes. Yes.

6 A. They do not. They do not.

7 Q. Do not have a computer?

8 A. No.

9 Q. Okay. So you can do testing on those  
10 without a computer attached.

11 You can do logic and accuracy testing with  
12 the precinct scanners without a computer attached?

13 A. Yes. The ICP unit.

14 Q. Yes.

15 A. Correct.

16 Q. So you have the rack with a server in it and  
17 with an ICC computer in it?

18 A. Correct.

19 Q. And you have five workstations.

20 Is there any other equipment that you have

5 A. Yes.

6 Q. And is that USB hub or is that Ethernet hub  
7 inside the rack or outside the rack?

8 A. Inside the rack.

9 Q. Is it assessable from outside the rack?

10 A. No. You have to go inside the rack to do  
11 that.

12 Q. And I think you said earlier, but I want to  
13 confirm.

14 Is there any way to access any of the  
15 equipment inside the rack either by plugging in  
16 storage devices or by plugging in cables from outside

21 A. Correct.

22 Q. Does it open in the front and in the back or

4           A. Right.

5           Q. What else do you do on election night?

6           A. That's it. I just make sure -- yeah.  
7 Results -- you know, print out results and put a copy  
8 of the result on the USB to be loaded by the Fulton  
9 County warehouse manager on ENR.

10          Q. And you said you don't know -- you don't --

14          A. Yeah.

15          Q. So if you are asked for help, then it's very

17          A. Correct.

18          Q. Do you have administrator access to the EMS

2           Q.   I'm sorry.

3           So you log in through a Window's  
4 administrator account on --

5           A.   Correct.

6           Q.   And when you do that, you said earlier that  
7 the people who are doing the adjudication are on  
8 client workstations. They're not logging into the  
9 server; right?

10          A.   Correct.

11          Q.   But when you log into the server, do you do  
12 that through a workstation or some other way?

13          A.   Yeah. So, yeah, the server screen -- just  
14 the screen from one of the workstations. And that  
15 workstation is the one in the rack with the server.

16          Q.   So one of the clients is inside the rack and  
17 that one is -- actually lets you log into the -- or

20          A.   No.

21          Q.   Okay.

22          A.   It shares the same screen with the server,

3 A. Yes.

4 Q. How do you do that switch? Is there a  
5 physical switch?

6 A. No. I have to just -- one is connected by a  
7 display cable, and the other by an LBGA, so...

8 Q. So if you want to work on the server  
9 hardware, you'll take out the connection to the  
10 monitor and plug in the connection from the server?

11 A. Correct.

12 Q. And then when you want to turn it back into  
13 a workstation, you take out the connection to the  
14 server and plug in the connection to the client  
15 hardware --

16 A. Yes.

17 Q. -- client computer?

18 A. Yeah. That's the screen. Again, the  
19 screen.

20 Q. But it's just a screen?

21 A. Yes.

22 Q. All right. When you're working on the EMS  
23 server, what kinds of things would cause you to need  
24 to work on the EMS server on election day?

25 A. No. Really, I don't go on the EMS server on

1 election day.

2 Q. If there's a problem with the RTR or the EED  
3 or the adjudication software, that has to be resolved  
4 by going onto the server hardware; right?

5 A. Again, I've never had -- encountered a  
6 problem with that, so I wouldn't -- like, I can't  
7 answer that.

8 Q. So have you ever logged into the EMS server  
9 as an administrator?

10 A. Yes.

11 Q. To do what?

12 A. To -- when I first -- when I was setting up  
13 those client stations, I had to, like --  
14 (unintelligible) -- people that are here, yeah.

15 And when the adjudication was -- was -- how  
16 do I put this. Like, when I will head up the  
17 application, so I have to go in to make sure they all  
18 have a right.

19 Q. I'm sorry. Say that last part again.

20 A. Yeah. So I went back into the EMS server to  
21 make sure they all have rights as users to access the  
22 adjudication license.

23 Q. Meaning that each of the workstations has

1 Q. As a user.

2 Because the workstations are clients of the

4 A. Correct.

5 Q. So they have to have authorization to be  
6 clients --

7 A. Correct.

8 Q. -- when you set that up on the server  
9 itself?

10 A. Correct.

11 Q. So apart from what sounds like initially  
12 setting up permissions to access the server, is there  
13 any other thing that would ever cause you to log into  
14 the server as an administrator?

15 A. Yeah. Like, if I am to pull logs.

16 Q. And when you say "pull" -- when you say  
17 "logs," what are you referring to?

18 A. Say event logs. So that gives me, like, a  
19 window of what happened and -- if I'm getting an  
20 error message or something, but...

21 Q. So if the server is having a problem, you'll  
22 look at the logs on the server to see what has

24 A. Correct.

25 Q. And anything else besides looking at logs

\*\*\*\*\* C E R T I F I E D \*\*\*\*\*

1 and setting up clients?

2 A. That will be all. No. That's all.

3 Q. So, basically, aside from setting up clients  
4 at the outset, basically, you only look -- you only  
5 log into the server to look at the logs; is that  
6 right?

7 A. Correct.

8 Q. And how often does that happen?

9 A. It only happened once that I can -- twice.  
10 Twice that I can recall, yes.

11 Q. What were those two occasions?

12 A. When Derrick asked me to get him the  
13 server -- the log files from the EMS server. The  
14 first time I gave him from the beginning of time to  
15 election night, which was August 11th.

16 And he got back to me like that wasn't what  
17 he wanted. He wanted till the present time. So I  
18 had to go back in to get those log files and...

19 Q. So you -- so those are the two times that  
20 you have done this?

21 A. Yes. Correct.

22 Q. So the first time Derrick Gilstrap asked you  
23 to get him the log files from the beginning of time

3 A. Yeah.

4 Q. And when did -- was that on August 11th that  
5 that happened?

6 A. No, no, no. That was after August 11th.

7 Q. So do you remember what -- when that  
8 happened?

9 A. I can't recall the date.

10 Q. So you haven't -- you didn't pull any logs  
11 on August 11th?

12 A. No, I did not.

13 Q. Now -- and the second time, was that the  
14 same day, the second time you went in to get logs for  
15 Derrick?

16 A. No, no. It was like two days after -- was  
17 it two days? Yeah. I can't remember, but it was not  
18 the same day. Definitely not the same day, no.

19 Q. So he decided what you gave him wasn't what  
20 he wanted?

21 A. Yes.

22 Q. And he asked you to give him something

7 A. Correct.

8 Q. And you think that -- and so -- and you  
9 don't remember what date he wanted you to go up

11 A. No. Until the present time.

12 Q. Okay.

13 A. You know, until the -- you know, until the  
14 morning of that -- I call it present time. Like  
15 until this very moment, so...

16 Q. But you don't remember what day that was?

17 A. No, I don't.

18 Q. So -- all right. So do you recall that we  
19 had an expert named Harri Hursti visit the warehouse  
20 on August 11th, on election night.

21 Do you remember our person coming to  
22 observe?

23 A. I know people come to observe. I don't know  
24 who hired them.

25 Q. So I will represent to you that Harri

1 Hursti, who is out expert -- one of our expert  
2 witnesses came to observe on the evening of August  
3 11th. And he observed some -- what appeared to be  
4 troubleshooting activity after 8:00 p.m. -- around  
5 8:00 p.m.

6 Does that sound like something you remember  
7 seeing?

8 A. On election night?

9 Q. On August 11th, yes.

10 A. Not with me. I didn't troubleshoot on  
11 election night.

12 Q. Do you remember there being any issues that  
13 require troubleshooting from any of your other  
14 Dominion colleagues on August 11th?

15 A. Yes. Brad, who was my regional, asked me,  
16 like, how do -- like, how can he get into the EMS  
17 server. And I -- you know, I showed him how and that  
18 was it.

19 Q. Did he say why he needed to get into the EMS

21 A. No.

22 Q. And do you remember was anything going on

24 A. No.

4 and --

5 Q. Okay.

6 A. Yeah. I overheard him talking about the  
7 phone. And I asked him -- I go to him, like, what  
8 password are you talking about?

9 And later on -- he didn't answer me at  
10 first, but later he came to me and said, I'm sorry.  
11 Everything looks right.

12 I was like, okay. But I didn't -- but I  
13 didn't go further because I didn't ask him, like, why  
14 are you trying to -- why are you saying the passwords

16 Q. Okay.

17 A. Yeah.

18 Q. And about what -- so he just -- he came to  
19 the warehouse and then he tried to get into the  
20 server and he had a password problem. And so he  
21 called someone about that.

22 Is that what your -- is that what I  
23 understand happened?

24 A. Okay. So what happened, again, when I was  
25 walking by the server -- because then it was like

1 6:30 and I was trying to, like, make sure most of --

3 start loading all the CF cards.

4 But I overheard him by the phone talking. I  
5 don't know what he --

6 THE REPORTER: Slow down. Slow down.  
7 Slow down. Slow down, please.

8 THE WITNESS: All right.

9 So I walked by the server and I  
10 overheard him talking on the phone. I don't  
11 know who he was on the phone with. But I  
12 overheard him saying the password was wrong.

13 So I -- then I asked him, like, What  
14 password are you talking about? He didn't  
15 respond to me.

16 But later on he came to me and said, Oh,  
17 I'm sorry. The passwords were right.  
18 Everything was right.

19 But I didn't ask him why or what was  
20 going on and he didn't tell me, so I left it  
21 that way, yeah.

22 BY MR. MCGUIRE:

23 Q. So based on what you saw, did he appear to  
24 be troubleshooting something at the server?

25 A. Again, I was fully concen- -- like, focusing

1 on closing those early voting sites to start loading  
2 up, you know, the CF cards because, you know, when --  
3 we trying to get the results out as soon as possible.

4 Q. And when he was looking for a password, you  
5 assumed it -- did you understand him to mean the  
6 password to log into the EMS server?

7 A. Again, he was sitting by the workstation.  
8 That's why I asked him, like, what password, and he  
9 didn't answer. He didn't respond to me.

10 Q. Did you ever see him log into the EMS  
11 server?

12 A. No.

13 Q. When you do need to log into the EMS server,  
14 how do you -- how do you do that?

15 A. So when I go to Fulton County -- what I  
16 did was -- because the server, to make it secure, I  
17 took out -- there wasn't a keyboard or mouse attached  
18 to the server, to the machine itself, to the  
19 hardware. So you -- for you to log into it, you need  
20 to, you know, manually go to the back, attach it a  
21 USB-type mouse or keyboard for you to type in those  
22 passwords. So I made sure that, like, I took those  
23 out.

24 So if I need to go get into the server, I  
25 need to go to the back and attach a keyboard or a

2 Q. And did you see Brad doing that?

3 A. No. But when he asked me, like he was  
4 trying to get into the server, I did that for him.  
5 But I didn't see him physically go into the -- like,  
6 you know, log into the server.

7 Q. So you -- when he asked you about the  
8 password, you took it to mean he wanted to log into  
9 the server and you attached the keyboard and mouse?

10 A. No.

11 Again, okay, I told you. I said I overheard  
12 him over the phone talking to someone about the  
13 password. The only thing he asked me when I walked  
14 into the warehouse was, How can I get into the  
15 server?

16 And I said, Oh. And I walked to the back, I  
17 switched the screen and I put in the keyboard and the  
18 mouse for him.

19 Q. Okay. Yeah.

20 And that happened before you heard him on  
21 the phone?

22 A. Correct.

23 Q. So he arrived and told you he wanted to get

3 Our person, our expert Harri Hursti who came

9 Marilyn usually comes with another person.

10 Is that the person -- is that Mr. Hursti?

11 Q. All right. I assume that night -- let me

14 A. Okay.

15 Q. So did you speak to him?

16 A. Yes, I did.

9 Q. Was he back there on the keyboard and mouse

14 A. No. No.

15 Q. As far as you know, was the -- was the

18 A. Again, I didn't know he was having -- like,

1 A. Correct.

2 Q. So is it unusual for people from Dominion to  
3 come and work on the server without advising you

5 A. Again, I'm just a contractor with Dominion.  
6 And they have -- I'm not an employee. They don't  
7 need to like, you know, let me know prior that anyone  
8 is coming. It's their property. I'm not trying to,

10 Q. Sure.

11 But is it unusual for that to happen or does  
12 this happen -- is this -- is this unusual? Was this  
13 an unusual event?

14 A. I'll say no, you know, because I -- again,  
15 that's -- that was the first time we did  
16 adjudication, so I believe they came, you know, to  
17 help out with adjudication, which I don't know about.

18 Q. So what makes you think that it had to do  
19 with adjudication?

20 A. I think -- I said because -- that's why the  
21 lady you showed me the picture of came in, so...

22 Q. And you think that that was the reason Brad

5 with Brad or separate from Brad?

6           A. Separate from Brad.

7           Q. Did he have any access to the EMS server

9           A. No. None -- not to my knowledge, no. No.  
10 Because when I came -- the only time I saw her, when  
11 she was working on the workstation, the adjudication  
12 workstation, so...

13          Q. So when you -- when you pulled the logs for  
14 Derrick Gilstrap from the beginning of time to  
15 August 11th, how -- when you say the beginning of  
16 time, what does that mean?

17          A. I mean beginning of time when the logs have

19 the first time. I didn't check the dates. All I did  
20 was download till August 11th.

1           A. Again, Fulton County has two boxes of about  
2 five hundred each -- in each box of USB. So anytime  
3 I want to pull any data from the server, I use a new  
4 USB each time. And I don't -- I don't format it. I

22          A. Yeah, yeah. You can -- I can download it.

5 you trying to see, what data are you actually trying  
6 to see, you know. So that was what I did.

13 did -- because when I saw August 11th so --  
14 because prior to August 11th, no one had  
15 logged nothing into the server.

16 So what I did was -- when I logged into  
17 the server, all I did was just download what  
18 I had prior to my, you know, session that I

1 Q. And when we talk about log files, what is  
2 recorded -- first of all, is that a Windows log or is  
3 that a Dominion program log?

4 A. It's a Windows log.

5 Q. So you're downloading a log of events that  
6 Windows has recorded?

7 A. Correct.

8 Q. And does that record events that happened  
9 with the Dominion EMS software on the server?

10 A. Correct.

11 Q. So it's logging everything --

12 A. It's logging --

13 Q. -- correct?

14 A. Yes.

15 Q. Now, do those logs -- is there some maximum  
16 size for those logs or do they just record forever  
17 until they get too big to have any space?

18 A. Yeah. They just get recorded, yeah.

19 Q. So is there any reason why the log would  
20 have gaps in it?

21 A. Not to my understanding, no.

22 Q. You didn't do anything that would have  
23 created gaps in the log?

24 A. No.

25 Q. So when you got the USB stick with the logs

1 on them the first time, what did you do with the USB  
2 stick?

3 A. I took it to Derrick's office and I hand it  
4 over to Derrick.

5 Q. And did you do anything else with it?

6 A. No. Not the first time, no.

7 Q. Did you see anybody else do anything with  
8 it?

9 A. No, no.

10 Q. So when Derrick got back to you a couple of  
11 days later and -- or a few days later, sometime  
12 later, and told you he wanted actually to take logs  
13 from the beginning of time to the present, did he  
14 give you back the same USB stick?

15 A. No.

16 Q. So did you get a fresh one?

17 A. Yes.

18 Q. And when you -- did you go through the same  
19 process of going into Windows and just using the  
20 Windows Event Viewer to get the log onto the USB  
21 stick?

22 A. Correct. Yeah.

23 Q. And this time you didn't filter it at all?

24 A. I didn't, no. Nothing.

25 Q. So everything that ever happened on that

1 machine should be in the log?

2 A. Correct.

3 Q. And the second time, what did you do with  
4 the USB stick?

5 A. So the second time that was -- that --  
6 coincidentally, that happened to be the last day they  
7 came in for adjudication. So when we're trying to  
8 like pull up ballot images on the adjudication  
9 workstation, the ballots were giving us an error like  
10 it can pull the image from -- from the server.

11 So what I did was I called Dominion, and I  
12 tried to explain what I was -- you know, the  
13 situation. They couldn't really understand what I  
14 was saying. So I know like, you know, technically  
15 what you can do for someone to like understand what's  
16 going on is like you could pull the log and let them  
17 see the error message. They will get it.

18 So I pulled the log file, and it was the  
19 same -- exact same log file I gave to Derrick. I  
20 took one to Dominion for Mitch to take a look at it.

21 Q. And that was on a different USB stick?

22 A. On a different USB stick, correct.

23 Q. So you pulled the log file for -- the second  
24 log file for Derrick before you pulled the log file  
25 for Dominion; correct?

1           A. Yeah. It's the same thing because -- so  
2 when you pull a log file, you can either -- you save  
3 it. You just don't -- you don't dump it on the USB.  
4 You have to save it probably in one of your folders.  
5 So I saved it on the desktop. It was -- the same  
6 folder I gave to Derrick was the same folder I took  
7 to Dominion.

8           Q. So you used the Windows Event Viewer to  
9 export the log to a file on the server?

10          A. Correct.

11          Q. And then you copy that file onto a USB  
12 stick?

13          A. Correct.

14          Q. And you took the USB stick away. And

3 A. Just me.

4 Q. Just you, okay.

5 So who was dealing with the adjudication  
6 issue? Just you?

7 A. Yeah, just me.

8 Q. And what date was this? Do you remember?

9 A. No. It was -- I don't remember. I don't.

10 Q. It was not election night, though?

11 A. Definitely not election night.

12 Q. It was after election night?

13 A. After election night, yeah.

14 Q. So do you -- do you understand what would be  
15 recorded in the log files? Like, if you looked at  
16 it, would you be able to tell if something was  
17 unusual?

18 A. Yeah. You have error messages, yeah.

19 Q. And just to be clear, is there any way for  
20 the log file to be generated by someone who is not  
21 physically typing on a keyboard attached to the  
22 server hardware?

23 A. Not to my knowledge.

24 Q. So no one has ever, to your knowledge,  
25 logged in remotely from Dominion to the server?

1 A. No. Not to my knowledge, no.

2 Q. So if they need to get something off the  
3 server, they physically come down and do it or they  
4 ask you to do it?

5 A. Correct.

6 Q. And that's -- that's never -- there is never  
7 any other way that that happens?

8 A. Any other way? You mean remotely?

9 Q. Yes.

10 A. No.

11 Q. Now, have you ever yourself looked at logs  
12 to try and figure out a problem that you're trying to  
13 solve on the server?

14 A. On the server?

15 Q. Yeah.

16 A. I just look at it, if it makes sense to me.  
17 You know, but most of the time it doesn't because, I  
18 mean, I was -- (unintelligible). So I could look at  
19 it all day long; I can't do nothing about it.

20 Q. I guess I'm just -- what I'm trying to get  
21 at is so you told us that there were two times when  
22 you actually pulled a log, which I take to mean put a  
23 log on a USB stick and took it off the server.

24 But have you ever actually looked at logs  
25 and not copied them off the server but just looked at

1 them to figure out what's going on?

2 A. Yeah. Just the same day I pulled the logs,  
3 both logs, one to Dominion and the one to Fulton  
4 County, I just -- I looked at the logs just to see if  
5 it made sense to me, but it didn't, so...

6 Q. And that was because you were trying to  
7 figure out what the problem was on your own?

8 A. Yes.

9 Q. And, once again, what date was that? Do you  
10 know?

11 A. I don't recall what date.

12 Q. Did you -- when you gave the USB stick to  
13 Derrick either time, was there anyone else there?

14 A. I don't recall. No. I -- no, I don't  
15 recall.

16 Q. Did -- is it possible that there was or do  
17 you believe there wasn't?

18 A. Again, I can't really say.

19 Q. And when you pulled the logs and looked at  
20 them the second time, did you notice that there were  
21 error messages in the logs?

22 A. Yeah. I saw the error messages, but like I  
23 said, I don't -- I didn't understand what they meant,  
24 so that's why I had to copy it and take them down to  
25 Dominion for someone to interpret it.

2 So I want to ask you just a couple of  
3 specific questions about August 11th, election night,  
4 the runoff election night.

5 I'm going to -- I'm just going to represent  
6 to you that the logs that we got, which I guess were  
7 the first -- the first logs you pulled stopped at  
8 5:31 on election night.

9 Does that seem right to you, given when you  
10 pulled the logs?

11 A. Again, when I pulled the logs, I didn't take  
12 a look at them.

13 Q. Okay.

14 A. I didn't look. I just copied and moved it  
15 over to the USB.

16 Q. Because you didn't pull the logs on election  
17 night; right?

18 A. No, I did not.

19 Q. So it was later?

20 A. Yes.

21 Q. But when you pulled the logs, they were  
22 supposed to go all the way through August 11th, so  
23 would you have expected them to go all the way to the  
24 end of August 11th?

1 Q. And are you aware of anything that happened  
2 around 5:00 p.m. on election night that would have  
3 produced hundreds of logout messages in the log?

4 A. No.

5 Q. And I'm also going to let -- represent to  
6 you that our expert has testified that on -- he  
7 visited again to the warehouse on August 25th, and  
8 that you were working on a problem that day, so  
9 perhaps it's -- you know, perhaps it's the  
10 adjudication problem you were talking about. Maybe  
11 not.

12 But he observed you working on a problem, he  
13 said, and he said that you compared logs from  
14 August 25th to the logs from August 11th.

15 Does that sound familiar to you?

16 A. No.

17 Q. So you don't have any recollection of that?

18 A. No.

19 Q. Were you present on August 11th at around  
20 6:50 a.m. in the morning at the warehouse?

21 A. 6:50? Yes.

22 Q. What were you doing there so early?

23 A. So early in the morning, I know election day  
24 it's mandatory for me to be at the Fulton County

4 Q. Was anyone else from Dominion there that  
5 early that day?

6 A. Correct. Yeah. The lady was there.

7 Q. But she didn't tell you to what she was  
8 doing?

9 A. She introduced herself, she said her name,  
10 but, again, I'm bad with names. So she introduced  
11 herself and, you know -- and she told me why she was  
12 there.

13 And I took her over to Derrick's -- no. I  
14 think she met Derrick earlier that -- I took her  
15 again to Derrick's office for Derrick to know, and  
16 Derrick told me she -- she's met her -- like, he's  
17 met her, yeah, so...

18 Q. So she -- I'm sorry. She did or did not  
19 tell you why she was there?

20 A. She did tell me why she was there. She told  
21 me she was there for adjudication and if I need help  
22 with anything. And I asked her if she was local,  
23 like -- she said no.

24 So I figured, all right, she wouldn't be of

4 Q. Did you understand her position within  
5 Dominion?

6 A. No. No.

7 Q. So you don't know if senior or junior or --

8 A. No, no. I do not, no.

9 Q. But she said she was there for adjudication,  
10 and she was there at 6:50 in the morning through the  
11 evening?

12 A. Correct. No. She -- 6:50, I'm not sure  
13 about what time she got in, but she was there early.  
14 Like when everyone was there, she was there.

15 Q. So when you were there in the morning -- and  
16 I -- I'm actually really interested in that time  
17 period, 6:50, 6:55, that early in the morning because  
18 there was a lot of activity in the log files around  
19 then.

20 So did anything noteworthy occur around then  
21 that you are aware of?

22 A. I don't recall. I don't. I don't recall.  
23 But if 6:50 -- for anything in the morning, I would  
24 have been the one to log into the server at that  
25 time.

10 Q. Okay.

11 A. So, yeah.

12 Q. So you would be logging into a client of the

14 A. Correct.

15 Q. And does the server run 24/7 or is it ever  
16 turned off?

17 A. Not off, no. It runs. No. It keeps  
18 running, yeah.

19 Q. So it's always running?

20 A. Correct.

21 Q. And what would you have logged in that early

23 needed to log in for?

24 A. Questions. There might be questions to know

3 THE REPORTER: Slow down. Thank you.

4 THE WITNESS: Sorry.

5 So in Fulton County, we have like three  
6 or four precincts combined, so we call them

8 So they might want to know probably 07F,  
9 is that the first -- like, the first  
10 precinct on the list. Then I need to tell  
11 them what split was -- other precincts that  
12 was attached to that 07F.

22 Q. Would you be surprised to hear that the logs

5 Q. If you see errors in the log that -- I know  
6 you say you don't necessarily understand everything  
7 in the log, but if you were to see errors that  
8 indicated access denied, what would that suggest to  
9 you?

10 A. Access denied. Maybe you put in the wrong  
11 password.

12 Q. Do you remember yourself putting in the  
13 wrong password when you tried to log in?

14 A. Yes.

15 Q. Did you do it that morning?

16 A. Possibly, yeah.

17 Q. Do you log in every day or just rarely?

18 A. Sometimes multiple times in a day. Multiple  
19 times.

20 Q. So do you have your passwords memorized?

21 A. Sometimes it comes to me, but most of the  
22 time I have to go get the password.

23 Q. So do you store those on paper or how do you  
24 store those?

25 A. On paper. It's a memo.

6 Q. And who else has the key besides you to that  
7 drawer?

8 A. The assistant Fulton County warehouse

10 Q. Anybody else?

11 A. Not to my knowledge.

12 Q. Would you have any reason or any way of  
13 explaining if the log files showed that Windows  
14 Remote Management services were started in the  
15 morning on August 11th?

16 A. That would be -- August -- no, that would be  
17 a surprise. No. I'm surprised.

18 Q. What are Windows Remote Management services?

19 A. I don't know.

20 Q. Okay. Do you have any -- have you ever  
21 encountered anything by that name before?

22 A. No.

23 Q. So what about -- I understand as well that

5 Q. So you don't recall coming back to the  
6 server at some point and seeing a screen that said  
7 your version of Windows has not been activated?

8 A. Come again? I didn't know the -- I didn't  
9 hear the first part.

10 Q. Sure. Sorry.

11 So you don't recall coming back to the  
12 server at some point on August 11th and seeing a  
13 screen that said, Your version of Windows is not  
14 activated or something to that effect.

15 A. Oh, you mean on the server?

16 Q. Yes.

17 A. I didn't log into the server on August 11th.

18 Q. Did you see anything like that on any of the  
19 client workstations?

20 A. No.

21 Q. So you don't have any recollection of that  
22 at all?

23 A. No.

24 Q. So now I want to turn to the evening,

4 What activities took place around that time?  
5 Was there anything going on on the server that would  
6 have caused log entries?

7 A. If I can recall, like, 5:20 I was just -- I  
8 was on my way back home from one of the precincts, so  
9 I was on the road, yeah.

10 Q. So you were not there at the warehouse?

11 A. No.

12 Q. And when did you get back from the precinct  
13 on August 11th, around that time?

14 A. Yeah. If I'm correct, it was about 6:00,  
15 close to 6:00. 6:00 or close to 6:00, yeah. Or even  
16 after 6:00. I'm not sure. Yeah. Because I  
17 remember -- yeah.

18 Q. And when did you leave the warehouse to go  
19 out that day?

20 A. It was -- I went out a couple of times. So  
21 the last time was around, I think, 3:30 or so, yeah.

22 Q. And is that -- so you were gone -- left at

2 A. Yes. I'm not sure about if it was 3:00  
3 because I had to drive -- I went to very far places,  
4 two far places, like one in the north and another one  
5 in the south, so...

6 Q. So to the best of your recollection, though,  
7 when were you -- when were you out from the warehouse  
8 on that trip?

9 A. On that trip? I will say for sure 5:00 p.m.  
10 I was not in the warehouse.

11 Q. You were not in the warehouse at 5:00 p.m.?

12 A. No, I was not in the warehouse at 5:00 p.m.

13 Q. And what about 30 minutes on either side of  
14 that? Were you -- was it -- were you gone then?

15 A. Yeah. 5:30, no. Because the minute I go  
16 back to the warehouse, I start preparing for --  
17 for -- to close out advanced voting sites. So I'm  
18 sure that was probably close to, like, 6:30.

19 Q. So when you came back from the precinct  
20 around that time on August 11th, did you see any of  
21 your Dominion colleagues working on the server or on  
22 the workstations?

23 A. The workstations, yes.

24 Q. Who was doing what?

25 A. Like I said earlier, they had -- I noticed

4 lady was there.

5 Q. And do you know what they were doing?

6 A. Like I said, on the screen, it was  
7 adjudication on the screen, so...

8 Q. For both of them?

9 A. No. Just one -- we have, like, three  
10 screens for -- three workstations for adjudication.  
11 So the screens weren't on, but they were there.

12 Q. And had the -- had the data from the USB --  
13 had the USB sticks from the Central scanner arrived  
14 yet at that time?

15 A. Must have been, yeah.

16 Q. What about the CompactFlash cards from the  
17 precincts?

18 A. No.

19 Q. Or the polling places?

20 A. No.

21 Q. No?

22 A. No.

5           Q. And that's what they were doing?

6           A. Yes.

7           Q. And were any Fulton County people or any  
8 vote review panel people there or was it just the  
9 Dominion people?

10          A. Yeah. Like I said, they had people. I  
11 wasn't even sure they were -- I can't recall right

2 Q. Okay. Mr. Olomo, welcome back. And you  
3 understand you're still under oath; correct?

4 A. Right.

5 Q. So I have just some follow-up questions to  
6 ask. First, I wanted to just talk to you about the  
7 logs.

8 Now, you talked about the EMS server logs,  
9 the software running on the EMS server creates logs  
10 in Windows on that computer; right?

11 A. Correct.

12 Q. Now, there are also five workstations and  
13 the ICC computer that are all connected to that  
14 server; right?

15 A. Correct.

16 Q. Do the workstations and the ICC computer  
17 themselves have logs?

18 A. They should have logs, but I've never tried  
19 pulling from those workstations.

20 Q. So you didn't look at pulling those logs  
21 when you pulled the logs Derrick Gilstrap asked you  
22 for?

23 A. No because he specifically stated EMS  
24 server.

25 Q. So those other computers are connected to

1 the EMS server; right?

2 A. Correct.

3 Q. Now, to your knowledge, do those -- do the  
4 logs on those client computers and the -- and the ICC  
5 computer, are they synchronized with the log on the  
6 server or not?

7 A. Now, it should because they are connected to  
8 it.

9 Q. So do you -- would you expect to see log  
10 entries from activity on a client computer show up on  
11 the server log?

12 A. (No response.)

13 Q. So I think we might have just cut out here.

14 A. You're breaking up in the first part.

15 Q. Yeah. Let me ask you again.

16 A. Yeah.

17 Q. So would you expect to see activity on the  
18 client computer show up in the log on the server  
19 hardware?

20 A. Yeah. Correct. Yeah.

21 Q. You would. Okay.

22 So if it's not there, what would that mean  
23 to you?

24 A. When you mean -- actually, that would be  
25 login activities; right? Like logging in and trying

2 Q. Well, let's say -- let's just say activity  
3 occurring on the client computer. Would any of that  
4 activity be synchronized to the log on the server  
5 computer?

6 A. No. If you're asking about activities, no.  
7 It's going to be saved under the local computer.

8 Q. But if the client is inter- -- if the client  
9 computer is interacting with the server as a  
10 client --

11 A. Yes.

12 Q. -- you'd see those interactions on the  
13 server log; correct?

14 A. Correct.

15 Q. So earlier when we talked about the access  
16 denied errors, you said that they might be from  
17 passwords being mistyped?

18 A. Correct.

19 Q. Is there also a possibility that an access  
20 denied error could result from a client attempting to  
21 do something on the server that it didn't have  
22 permission to do?

23 A. Not to my knowledge.

24 Q. Do you know that it's not possible or do you  
25 just not know?

1 A. I don't know.

2 Q. So when you pulled the logs for Mr. Gilstrap  
3 at his request, you said you used the Event Viewer on  
4 the server machine; correct?

5 A. Correct.

6 Q. So when you use the Event Viewer on that  
7 machine to view logs, you're logged in as an  
8 administrator on the server; right?

9 A. Correct.

10 Q. So that means you have permission to do  
11 anything that can be done on that server?

12 A. Correct.

13 Q. So when you use the Event Viewer as an  
14 administrator, are you able to delete individual log  
15 entries?

16 A. No.

17 Q. Do you know that for a fact or are you -- I  
18 mean, is that -- do you know that for a fact?

19 A. Yeah. I didn't delete nothing.

20 Q. Oh, no, no. I'm not asking whether you did  
21 do it.

22 A. Oh.

23 Q. I'm asking whether an administrator who's  
24 viewing a log through the Event Viewer can delete  
25 individual log entries?

1 A. Yeah. I wouldn't know, no.

2 Q. And when you're logged in as an  
3 administrator, can you delete the log file  
4 altogether?

5 A. No. I wouldn't know.

6 Q. So you wouldn't know the answer to that?

7 A. Yeah, no.

8 Q. If you had to -- if Mr. Gilstrap were to ask  
9 you to pull the client logs, what would you have to  
10 do?

11 A. It's the same process. I will go to the  
12 individual workstations and pull the logs.

13 Q. Now, you said that the client computers are  
14 all connected via an Ethernet cable through an  
15 Ethernet hub to the server; right?

16 A. Correct.

17 Q. Does anyone ever plug devices into the  
18 client computers that are outside the rack like USB  
19 sticks, CF cards or anything else? They have ports  
20 for those devices; right?

21 A. Correct.

22 Q. So does anyone ever plug anything, to your  
23 knowledge, into those ports?

24 A. Yes.

25 Q. Like what kinds of things?

1           A. Like you said, CF cards -- card reader, CF  
2 card reader, like you can, like, upload the results  
3 on election day or during L&A you can use one of the  
4 workstations to load results.

5           And just like the USB, when we print results  
6 from the Central scanner, you transfer those results  
7 using the USB. So we plug in the USB to one of those  
8 workstations to upload those results in the RTR.

9           Q. And so those are devices that are -- storage  
10 devices that are used to transfer vote-related  
11 information; correct?

12          A. Right.

13          Q. Are there any other -- are you aware of any  
14 other devices ever plugged into those computers?

15          A. No.

16          Q. You're not there 24/7, though, are you?

17          A. No, I'm not.

18          Q. So it's possible that someone when you're  
19 not there could plug a device into those client  
20 workstations; is it -- isn't it?

21          A. To the best of my knowledge, no.

22          Q. What would stop them?

23          A. No. I'm saying, like, for me witnessing it,  
24 no.

25          Q. So you've never seen it happen; right?

1 A. I've never seen it happen, yeah.

2 Q. And -- but if you're not there, it's  
3 possible that it could happen?

4 A. Again, to the best of my knowledge, no.

5 Q. So what you're saying is, to the best of  
6 your knowledge, it hasn't happened; right?

7 A. I wouldn't say that -- to the best of my  
8 knowledge, no, no.

9 Q. So I'm just trying to distinguish between  
10 what you've seen, which I know is nothing because  
11 you've said that --

12 A. Yeah.

13 Q. -- and what could happen, which that's what  
14 I'm trying to get at.

15 And what would stop somebody from being able  
16 to plug something into one of those client  
17 workstations when you're not around?

18 A. I'll say nothing, but -- yeah, nothing.  
19 Nothing is going to stop a person, yeah. It's a port  
20 you can easily -- yeah.

21 Q. You can easily plug something into it?

22 A. Yes.

23 Q. Now, besides Derrick Gilstrap, did anyone  
24 give you any instructions on what logs to pull on

2 A. No.

3 Q. So did anyone from Dominion have any  
4 involvement with that process at all?

5 A. No. I only -- I only reached out to  
6 Dominion for permission to pull those logs.

7 Q. And did you do that both times?

8 A. Yeah, the first time. No. Just the first  
9 time.

10 Q. The first time when you pulled it from the  
11 beginning of time to August 11th?

12 A. Yes.

13 Q. And then the second time you didn't ask  
14 Dominion about it?

15 A. No.

16 Q. And why not the second time?

17 A. Because they are asking for the same  
18 information. They just -- they just want -- I didn't  
19 understand what was required of me the first time,  
20 so...

21 Q. And did anyone from Dominion the first time  
22 you asked give you any instructions about how to do  
23 it or what to do or anything like that?

24 A. Yeah. I'll say -- yeah. They just gave me

1 Q. And what did they say how you should go  
2 about it?

3 A. No. But I think there was -- I don't want  
4 to because I can't really recall because they asked  
5 for -- the very time Derrick asked me to pull the log  
6 file, he was also requesting for ballot images.

7 Q. Okay.

8 A. So I don't recall which one of those like  
9 Dominion talked me through to get those images, This  
10 is where you need to find those images or the log  
11 files. But I don't think I had help, you know,  
12 pulling the log files. It's what I can do. But the  
13 images, that's Dominion's application. They need to,  
14 like, let me know how to go about it that.

15 Q. So when you say you called Dominion, you --  
16 to -- you -- in response to Mr. Gilstrap asking you  
17 to pull the log files --

18 A. Yeah.

19 Q. -- you don't think you -- you do or you  
20 don't think you talked to them about the log files?

21 A. I did talk to them about the log files, but  
22 your question was did they talk me through it, like  
23 how to pull the log files, that I didn't -- because  
24 they had -- Mr. Derrick asked me two different

2 So I can't recall if it's -- I was -- I got  
3 help from Dominion on how to pull those images not  
4 the logs because I could pull the logs myself.  
5 That's a Windows thing.

6 Q. So did anyone from Dominion ask to review  
7 the log files before you gave them to Mr. Gilstrap?

8 A. No.

9 Q. And did anyone from Dominion review them  
10 after you gave them to Mr. Gilstrap?

11 A. No.

12 Q. And the first time I think you said  
13 Mr. Gilstrap gave the USB stick with the log files to  
14 whoever had requested them, which was our expert.

15 A. Yeah.

16 Q. But the second time, were you the person who  
17 handed the USB drive to Mr. Hursti?

18 A. No. I gave it to Derrick.

19 Q. And did he not give it back to you and you  
20 then you gave it to Mr. Hursti?

21 A. No.

22 Q. You don't recollect that?

23 A. No. No.

24 Q. I just want to also confirm my understanding

1           So you testified that the rack -- that the  
2 server and an ICC computer, and I believe that's it,  
3 were kept inside the rack; correct?

4           A. Correct.

5           Q. And the rack is not locked. It's closed,  
6 but it's not locked; correct?

7           A. (Audio distortion.)

8           Q. I'm sorry. You're cutting out.

9           A. Yeah. It had the lock -- can you hear me?

10          Q. I can now. Let me ask again.

11                 So you testified earlier that the rack is  
12 closed but not locked; correct?

13          A. Correct.

14          Q. And the rack is kept inside the warehouse in  
15 what you refer to as a room. I just want to  
16 understand better.

17                 Is the room a walled-off enclosure within  
18 the warehouse or is the room the space within the  
19 warehouse?

20          A. Okay. To explain this better, I believe  
21 this is more like a Fulton County question.

22          Q. Okay.

23          A. But, yeah, like I explained to you the first  
24 time, it's a room within the warehouse, yeah.

25          Q. And you said people work in the room, and

1 they enter and exit it without keys; correct?

2 A. What you mean, "keys"? Because the door --  
3 it has the door, and when you want to come in, you  
4 have a sign-in sheet. You walk in and you walk out.

5 Q. So people walk into this room through a  
6 door, which has a sign-in sheet, but the room itself  
7 is -- I mean, how large -- how large is it? What can  
8 you compare it to in size?

9 A. I'll say an airplane hangar warehouse.

10 Q. So it's about the size of an airplane  
11 hangar?

12 A. Yes, warehouse; right.

13 Q. And that's the room that the cage is kept  
14 in, the server cage?

15 A. Correct.

16 Q. And that is the room that people enter and  
17 exit through a door with a sign-in sheet?

18 A. Correct.

19 Q. And I understand earlier that that door is  
20 not locked, but people are expected to sign in when  
21 they come in and go out; right?

22 A. During working hours; correct.

23 Q. During working hours; right.

24 Now, you also said that the server passwords

1 paper in a locked drawer; is that right?

2 A. Yeah. Correct.

3 Q. And is that drawer near the rack?

4 A. Yeah. Just by the rack, yes.

5 Q. It's just by the rack.

6 And only you -- only the Fulton County  
7 assistant manager has the key to that?

8 A. Yes.

9 Q. Now, Mr. Hursti has testified that a file  
10 was kept on the server that actually had passwords in  
11 it and that you asked him to delete a photo of that.

12 Is that something you recall?

13 A. Yeah, I recall that. I did it.

14 Q. What -- well, why are passwords stored in a  
15 file on the computer?

16 A. So those files -- first, they shouldn't be  
17 taking pictures. To my understanding, it's secured,  
18 but I can't say -- I can't stop them from doing --  
19 taking pictures. That's Fulton County. They  
20 shouldn't be taking pictures.

21 And why those passwords were saved under --  
22 that wasn't the password to get into the server or  
23 the workstation. Those are passwords to get into the  
24 project.

25 Q. Into the project?

1           A. Yeah. It's because typing in those  
2 passwords, most of the time they're a headache, so I  
3 just put them on -- what you call -- on a notepad,  
4 and it's right there on one of the drives.

5           Q. And what is the project that that's a  
6 password to or that the passwords go to?

7           A. That's for the training project.

8           Q. So to -- so each project within -- each  
9 project that the server has has its own password?

10          A. Correct.

11          Q. And so the passwords that were on the screen  
12 during Mr. Hursti's visit were not the server  
13 passwords you're saying?

14          A. No.

15          Q. They were passwords just to whatever project  
16 you were looking at?

17          A. Correct.

18          Q. And where did you write that down into the  
19 notepad file from? Was it from the paper in the  
20 drawer?

21          A. No. It was from -- yeah, it's a memo,  
22 but -- so when you have -- and each election, when  
23 the database comes in, it comes in with a password  
24 for that project.

25                 So -- but after I, you know, pull the

2 Derrick.

3 Q. And so -- and that comes from Fulton County  
4 with a password?

5 A. Yes. Right.

6 Q. They are the ones who create the project and  
7 create the password?

8 A. I wouldn't say yes to that. I don't know.

9 Q. Do you know who does?

10 A. I don't.

11 Q. But it comes from Fulton County to you  
12 already set up?

13 I think you've frozen.

14 Is that correct?

15 A. You were breaking up a lot.

16 Yes. Yeah.

17 Q. So I'll ask again.

18 A. Can you repeat the question?

19 Q. Sure.

20 So the project comes to you with a password  
21 already created, and it comes from Fulton County?

22 A. Correct.

23 Q. So when you -- when you -- I just want to

2 A. Correct.

3 Q. You said that you only upload results when  
4 you do that?

5 A. Correct.

6 Q. Now, when you put in the CompactFlash card  
7 and you're doing this in a client workstation, a menu  
8 is displayed, yes?

9 A. Correct.

10 Q. And the menu gives you options to load, it  
11 gives you checkboxes for what you want to load;  
12 right?

13 A. Correct.

14 Q. And one of the checkboxes is results only,  
15 one is images, and one is audit logs; right?

16 A. Correct.

17 Q. And this is when you're dealing with the  
18 CompactFlash cards, yes?

19 A. Correct.

20 Q. So has anyone told you to only select to  
21 upload results? Is that a policy that someone has  
22 communicated to you?

23 A. No. The -- during training, that was how I

3 So your training was to not upload images or

5 A. No. No one told me not to, but I wasn't  
6 trained like that. During training, no one checked  
7 that box, so I didn't check it.

8 Q. So in training, they only checked the

10 A. Correct.

11 Q. And so that's what you do?

12 A. Correct.

13 Q. But you're not under instructions to only

15 A. No. No one told me that, no.

16 Q. If you wanted to upload images and audit

18 how to do that?

19 A. No, because I wasn't trained that. I would

2 Q. So you -- you also -- the last thing I  
3 wanted to talk about was the logic and accuracy  
4 testing.

5 You noted that your -- the requirement is to  
6 test each race for each ballot style on each machine;  
7 right?

8 A. Correct.

9 Q. Now, observers have reported that that is  
10 not happening.

11 Are you aware of that not happening?

12 A. Again, like I said, I think L&A, all I'm  
13 there to do is show Fulton County employees how to  
14 use the machine. So how -- the process of doing the  
15 L&A is up to Fulton County employees, and how they  
16 correct it, so that's not --

17 Q. So -- okay. So I thought I -- I thought  
18 earlier you said that sometimes you do part of it and  
19 they do part of it. Is that not right?

20 A. Yeah. I said yeah, I do parts of L&A, yeah.

21 Q. But when you're doing part of it, are you

1 different stages of L&A. That's -- that's the voting  
2 process. That's the process you're talking about  
3 now.

4 They're different. Like, before that, you  
5 can load the data -- when I say "data," it's not like  
6 the election data, but you load the BMD data on the  
7 ICX. So I do that.

8 I do that and I -- sometimes I just try to  
9 help them select the right precinct because I don't  
10 want the wrong ICX going to the wrong location.

11 So -- but the last time I did, the actual  
12 voting, that was a match, during the match election,  
13 the election never happened. But during the match, I  
14 did print out ballots, and I did it the way that I  
15 was told -- I was taught how to do it.

16 Q. So you did not do L&A for the August 11th
